Bldg. 101 Room 26
Perry Point, MD 21902
(410) 642-2411 Ext. 5215
marc.dallaire@va.gov

Services Performed / Scope of Work

This project involved a campus-wide cable TV upgrade from the existing hard-line system to fiber optics. Patriot GS, Inc. utilized existing as well as new raceways in order to run the feed from Perryville to Building 20 located at the center of the campus. The distribution will feed from Building 20 to the entire campus. The new upgrades that were made throughout the approximately 400-acre Perry Point VA Campus will not only provide cable TV service, but also allow for upgrades to security, communications and special systems through the new fiber backbone via spare strands of single mode fiber.
