Department of Veterans Affairs Medical
& Regional Office & Center
1601 Kirkwood Highway
Wilmington, DE 19805-4989
(302) 994-2511 Ext. 4896
michael.white@va.gov

Services Performed / Scope of Work

The project included the removal of the existing steel pedestrian bridge, wood decking, outdated railings and associated concrete stairs and walkways. The BGSi Team installed a new steel footbridge with TREX decking, replaced the concrete staircase and sidewalks, and installed new aluminum hand railings. In addition, a cooling tower and concrete pad/footings were removed and a new concrete pad with protective bollards was constructed for a new hazardous material storage container. The Team developed a comprehensive work schedule in order to minimize downtime for the bridge and utilized alternate pathways, barricades and signage to ensure pedestrian safety.
